Focus

Fund 310, Storm Drainage Bond Construction, provides bond support for storm drainage improvement projects throughout the County. Projects include streambank stabilization of areas where severe bank and channel erosion have occurred, as well as the installation of improved storm drainage systems to correct house, yard and street flooding.

The County's stormwater control needs are funded by the 1988 Storm Drainage Bond Referendum, the General Fund, the Pro Rata Share Program (Fund 316), and the Stormwater Management Program (Fund 318). The Pro Rata Share Program, adopted in 1992, requires one-time payments from developers of new developments to pay for a portion of the cost of off-site improvements. In FY 2006, Fund 318, Stormwater Management Program, was created by the dedication of one penny of the Real Estate tax to address prioritized capital improvements in the County's stormwater system. Fund 318 is now the primary source of funding of stormwater capital improvements. As Watershed Management Plans are completed throughout the County, the list of stormwater capital projects will be updated, and revised funding requirements and strategies will be developed for the entire program.

No funding is included for Fund 310, Storm Drainage Bond Construction, in FY 2008. Existing projects will utilize remaining funds from the 1988 Storm Drainage Bond Referendum to support neighborhood drainage improvement projects and studies in order to determine the best course of action for existing storm drainage problems.
